

Clover Environmental Solutions offers a free of charge empty printer cartridge recycling programme. We use national couriers to collect the cartridges for recycling. In order to help us achieve a successful first collection please note the following information:

Please follow our packaging guidelines, available separately, to ensure your boxes are packed correctly

Boxes ready for collection should be located within a reception, goods-in or loading bay facility on the ground floor (not behind security barriers or locked / multiple doors)

Parking facilities need to be close by to ensure couriers can safely leave their vehicles unattended.

Couriers have a limited time to make the collection so we request the boxes are available upon arrival

We require the name of a person onsite who will be available during the collection window. This person would generally be within reception or goods - in area. The courier will ask for named person on arrival

As a reminder please ensure that each box does not exceed 25kgs. You should be able to comfortably lift the box

Please note it is the responsibility of the person arranging the collection to ensure the correct box is given to the courier.

Thank you for your help to ensure collections are achieved in the quickest possible time.
